## PROFILE SUMMARY

A motivated and self-driven fresher with a strong foundation in Python, Data Science, and Web Development. Recently completed a Data Science training program, gaining hands-on experience in data analysis, visualization, and basic machine learning concepts. Passionate about problem-solving and building real-world solutions, I am eager to start my career in a challenging environment where I can apply my skills, learn continuously, and contribute effectively to the organization.

---

## PROJECTS

### 1. Expense Tracker

Tech stack – HTML, CSS, JS

Description – Built a Python-based Expense Tracker application to monitor, categorize, and analyze daily spending patterns.

[View](#)

### 2. Bike Price Prediction

Tech stack – Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

Description – Developed a bike price prediction model using machine learning techniques to analyze features and accurately estimate vehicle prices.

[View](#)

### 3. Laptop price prediction

Tech stack – Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

Description – Developed a machine learning model to predict laptop prices based on features like brand, specifications, and performance.

[View](#)

### 4. Review Prediction

Tech stack – Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook, NLP

Description – Developed a machine learning model to predict user sentiment from reviews using natural language processing techniques.

## WORK EXPERIENCE

### 1. Digital Marketing

**Intern Duration:** 3months

- Worked on social media planning and Online promotion strategies.
- Gained hands-on experience with tools like Canva and Instagram insights.
- Designed engaging Posts.

## 2. Frontend Developer – College Project

**Project Title:** Object Detection through Live Camera

**Role:** Frontend Development

- Created the UI using HTML, CSS, and JavaScript.
- Collaborated with the team to ensure responsive design and smooth user experience.

## 3. Data Science Intern – Upflairs Pvt. Ltd.

**Duration:** 1 Month

**Role:** Data Science Intern

- Worked on data preprocessing, cleaning, and exploratory data analysis (EDA).
- Built and trained machine learning models for prediction tasks using Python.
- Utilized libraries like NumPy, Pandas, and Scikit-learn for data analysis and modeling.
- Collaborated with the team to improve model performance and interpret results effectively.

---

## SKILLS

<b>Technical skills</b>	-	HTML, CSS, JavaScript Python, Numpy, Pandas, Matplotlib, Seaborn, Deep learning Jupyter Notebook, C++ Git & Github Knowledge Microsoft Office (Word, Excel) VS Code Editor, Notion
<b>Soft skills</b>	-	Team Collaboration Time Management Problem Solving Quick Learner Positive Attitude Communication (Hindi / Basic English) Adaptability

---

## EDUCATION

<b>Diploma in Computer Science</b>	-	DPG Institute of Technology and Management, Gurugram, Haryana, Aug 2023 – May 2025
<b>Senior Secondary (12<sup>th</sup> Science)</b>	-	Floyam Sr. Sec. School
<b>Secondary (10<sup>th</sup>)</b>	-	Rao Capital Sr. Sec. School
